

Custodio Digital

Institutional Custody of Digital Assets

What is CUSTODIO?

CUSTODIO represents a distinctive and sophisticated solution, meticulously crafted for the institutional management of digital assets in Europe. It offers an immutable digital chain of custody to ensure the security of each phase in the intervention, management, and transfer of assets.

- Main Features -

Comprehensive Traceability

Every interaction with digital assets is documented in an immutable chain of custody, guaranteeing that all steps are traceable and verifiable throughout the police, judicial, and administrative processes.

Unique Private Keys

CUSTODIO generates a unique private key for each confiscated device, thereby ensuring asset security and preventing the commingling of assets from various investigations.

Enrichment through Metadata

It integrates images, videos, and geolocation data into the chain of custody, offering enhanced context and improved accuracy at each stage of the custody process.

Cryptographic Security

CUSTODIO employs HSM modules to enhance cryptographic protection, ensuring optimal security against both internal and external threats during asset management.

Flexibility and Control

CUSTODIO is a local solution that adapts to each institution without external connections, seamlessly integrating with existing systems and expanding flexibly, ensuring complete and secure control.

Legislation and Regulations:

It complies with GDPR, the MiCA Regulation, ISO/IEC 27001, and the National Security Scheme, ensuring that all operations adhere to current European regulations.

- Who We Are -

CUSTODIO DIGITAL is an emerging company, a spin-off of Aircury S.L. and Dioxinet S.L., both of which are engaged in the development of **advanced technological solutions** for the educational sector and data analysis. Leveraging our **expertise in digital asset management**, our **multidisciplinary team** is dedicated to delivering **innovative tools** that enhance the operations of various public institutions across Europe.
